DEMOCRACY'S SECOND CHANCE: LAND, WORK AND CO-OPERATION, by George Boyle. Sheed & Ward, 1944. 177p. 280.2 B692

In Part I of this book, Ideas and Attitudes That Underlie Rural Life, Mr. Boyle expresses his feeling that people have fled from the land to urban centers because rural life had lost its self-respect, and people felt that they did not function in important and satisfying fields of endeavor as agrarians. In an industrial age they lost sight of the qualitative values and of the importance of organic power. He calls for a new philosophy of nature and of work and a realization of the cultural values of rural life and common work.

In Part II, The Co-operative Estates of the Future As An Instrument Of A Decentralist and Human Order, the author discusses co-operatives and credit unions, the consumer establishment, and adult education in the rural community. In this part of the book, also, Mr. Boyle emphasizes some of the twisted values and misguided ideals that are often accepted standards in American life.

THE LORD HELPS THOSE..., by B. B. Fowler. Vanguard, 1938. 180p. 280.2 F82

In this discussion of how the people of Nova Scotia are solving their problems through co-operation, Mr. Fowler gives a vivid picture of the work of

Dr. J. J. Tompkins, the man who was not afraid to follow his own belief that a man to do anything revolutionary and constructive must live dangerously, as he lead the army of the oppressed into a new order where they could regain self-confidence and self-respect through constructive self-help. Mr. Fowler seems to say to all who are leaders, to all who would help the common man, "Go thou and do likewise."
